SERVICE GARAGE, Stony Plain.

Heading for Home.

The motor party headed by Mr G Botsford which left her last month on a trip East, is now on its motor way back to Stony, having left Kingston on Monday last, headed for Toronto. On leaving here the party wended its way down thru St Paul and Chicago, visiting Buffalo and Niagara Falls, and coming back to Canada on crossing Lake Ontario. Arriving in Frontenac County the party visited Seeley's Bay, on the Rideau, where Mrs Murd McKinlay's mother lives. The party also visited a number of the old historical places in Eastern Canada before embarking on its return trip. It may be another ten days before the travelers reach here.

Mr. Larson's Trip to Jasper.

Mr L M Larson, proprietor of the Royal Cafe, returned on Thursday with his party from a motor trip thru the Rockies. The visit to the Jasper area proved very interesting to those of the visitors who had not been there before. A visit was made to Jasper Lodge, of course, where the party dined and listened to the magnificent orchestra. A run out to Maline Canyon and Lake followed.

The Larson party had the privilege of making a 25-mile run down the new driveway, now under construction, from Jasper to Banff. Mr Larson says the road will be the "finest ever" when completed, in the course of a few years.

An ascent was made to the Cavell mountain peak, 8370 ft. above sea level. The climb up the mount was some feat—starting at 3456 ft. above sea level and attaining the height of 8370 ft. The party enjoyed the outing immensely, and are willing to try it again at any time.

Mr. Laird's Motor Accident.

Their many friends in town and district will be pleased to hear of the good recovery that Mr and Mrs Hal D Laird are making, following an accident to them while motoring. Mr Laird's car collided with a heavy gravel truck at a cross-roads intersection.

Mr Laird suffered from cuts about the face and fractures of three ribs, while Mrs Laird was cut badly about the face.

John H. Enders Buried.

John Henry Enders was born on the 19th day of Aug., 1899, in Stony Plain; died on August 8, 1932, at the age of 32 yrs. 11 mos. 20 days. The funeral service was conducted by Rev H Kuring. The surviving relatives are, his father John Enders; two brothers Joseph and Philip; six sisters, Elizabeth, Barbara, Matilda, Mary, Emilie, Margaret, and 2 brothers-in-law, Mr P Altheim and Mr Jac Altheim.

Mr John Armbruster had charge of the funeral arrangements.

Mutual Trust Must Be Re-established

One of the most interesting and thought provoking articles it has been our privilege to read for some time, and in these days of depression and pessimism it is as refreshing as a heavy shower on parched land, appeared in a recent issue of Toronto Saturday Night from the pen of Nicholas Ignatoff, a gifted young Russian engineer and thinker now resident in Canada. Mr. Ignatoff knows his native land and has written thoughtfully and sympathetically of it, but in the article to which we now refer he writes of "the British Empire as a new-Canaan seed."

As he sees it the British Empire is not menaced so much by external enemies by Bolsheviks or Communists, but by crude materialists within the Empire that are intent on dealing exclusively with material, economic values—those individuals who have abandoned the best traditions of the Anglo-Saxon race and have plunged into the abyss of crude money-worshipping, greedy, corrupt politics which care nothing for duty and public service. The real enemies of the Empire are those who have cut themselves away from the vital sap of the historical, spiritual life of the mother country.

Mr. Ignatoff declares that it is not only his conviction, but the conviction of one of the foremost economists of the British Empire, Sir George Paish, that the way to general recovery does not lie so much in the field of economics as it does in the moral, spiritual sphere, which affects primarily our politics, and reflects adversely on economics. Sir George Paish points out that as long as politics are dominated by fear, suspicion, distrust and narrow self-sufficient nationalism, no economic remedy can solve the depression; and just as soon as our mental attitude is changed and gives place to a desire to co-operate, compromise and trust one another, the economic situation will solve itself. In his book, "The Way to Recovery," Sir George declares:

"By reducing fear with confidence, justice with moderation, and co-operation, a sound healthy growth would be introduced."

Continuing, Mr. Ignatoff says that when it is pointed out that one of the root causes of depression is the collapse of our present credit system, it is never realized by the crude materialist that here we are dealing practically exclusively with moral values. In the first place, credit being based on the future, it is obviously non-material; it is primarily based on trust. The general breakdown of credit implies nothing more than the collapse of morals, the break-down of mutual trust. Internationally, countries are no longer trustworthy because they do not honour obligations; because they are suspicious and fearsome, selfish and greedy. Within nations, the same applies among individuals—there is general misuse of credit—credit is employed largely for anti-social purposes by greedy, unscrupulous, immoral individuals. The solution of the paradox of scarcity in the midst of plenty is spiritual, not material. A little thought will convince one of the truth of these observations, yet they are dubbed "platitudes" by so many worldly wise people.

Until fear is dispelled, suspicion allayed, confidence restored, there can be no real and lasting economic recovery, because, until these better conditions prevail, credit will not be established. Credit is for the future, and the future is the one permanent foundation on which a credit structure can be erected, and until credit is restored the world will remain economically sick. So long as fear and suspicion rule men and nations, so long as narrow nationalism, because of such fear and suspicion remains the guiding policy of the nations, so long will trade obstructions be maintained, so long will there be an absence of credit. And just as long will the peoples of the world suffer economic hardship and loss. Therefore, it can be repeated, what the world stands in need of today is a spiritual readjustment rather than economic reorganization. Given the first, the second will automatically and quickly follow. But without the one the other is impossible.

Lack Real Leadership

U.S. Public Opinion Not Yet Ready For Debt Readjustment

The New York Evening Post, agreeing that virtual cancellation of war debts must come, says that general United States "public opinion is not quite ready for the debt readjustment which her eastern seaboard now recognizes as inevitable." Public opinion "is not quite ready" because the United States public "has not yet fully appreciated the financial purposes in pretending, though they must have known better, that the debts were collectable. When they begin to deal with the question realistically, as is now the case, public opinion in the United States will except the cancellation as not only inevitable but desirable. The people are all right if they are given competent leadership. But what leadership they have had, in all the allied countries, since the war!—Winnipeg Free Press.

"Well, I've brought back the car you sold me."

"How come?"

"When I bought it I thought '632 was the license number, but now I realize it's the year of manufacture."

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Landry, Moncton, N.B., writes:—"I can certainly recommend Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels."

"Last summer I had such awful pain in my stomach, and lower part of my bowels, at times, I would have to sit down. I took 'Dr. Fowler's' and it relieved me."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Poor Crop Prospects In Russia

Believe Country Will Need All Its Grain For Food

Poor crop prospects in Russia are indicated in the report by the Soviet Central Statistical Bureau of Statistics received by cable from its London correspondent. "Grain exports," the summary declares, "are dependent upon the policy of the Soviet Government and the urgency of the need of foreign currency. The country needs all its grains for food, especially in view of the continued acute shortage of other foodstuffs."

Since it was the flood of Russian wheat on the market last autumn that broke the prices, the Russian crop prospects are of particular interest to Canada. Last year Russia exported, to July 31, 71,000,000 bushels, but the present report indicates that it will reach nothing like the record proportions this year.

The summary states: "Vegetables are lacking for the winter months and at present vegetables constitute a large part of the diet as grain reserves, excepting army supplies from 1930 crop, are consumed. The foregoing and other factors, including a tremendous discrepancy between open market and collective prices, the freedom of peasants to sell on the open market after December, and acute shortage of manufactured goods to trade for grain, indicate unprecedented difficulties in collecting the government's share of the harvest. Much poorer crops than last year are indicated in the areas around export centers."

Oldest In The World

Ancient Skull Is Found While Excavating In London

The oldest known human skull belonged to a London woman, G. Elliot Smith, professor of anatomy at the University of London, stated at a meeting of the international congress of prehistoric and proto-historic sciences.

"The skull is known as the Lloyd's skull," he said, "and was found in blue clay 40 feet below the surface during excavations for the new home of Lloyd's corporation in Leadenhall Street. "It belonged to a woman about 50 years old, who probably was left-handed."

After considering all the evidence, and carefully studying all other known skulls of the kind, Professor Smith said, he decided the London skull represented the earliest genuine remains of homo sapiens, giving it pride of place over the Java man, the Peking man, and all other prehistoric finds.

The other attendants at the congress expressed great surprise over the announcement and left the hall immediately afterward to examine the skull and discuss the problem.

No More Asthma. Dr. J. D. Kellogg's "Asthma Liniment" will knock all of this trying trouble. It stops the awful choking and painful breathing. It guards against night attacks and gives a new lease of life and strength. Used the whole night long. Much is claimed for this remedy, but nothing but what can be demonstrated by a trial. If you suffer from asthma, never leave a vestige of stickiness. Persian Balm is the one toilet requisite for the woman who cares for charm and elegance.

Serum For Addison's Disease Is Expensive

Fifteen Oxen Are Required To Supply One Dose

Fifteen oxen are required for a newly discovered treatment for Addison's disease.

Successful results of the treatment have been obtained at a London hospital.

Fortunately the disease which attacks the pituitary gland and stops growth is rare, for the expense of extracting one dose of serum from fifteen oxen is enormous.

The life of one patient was saved with this new treatment, but \$125 was spent on him to do it, and the treatment continued to cost \$5 a day.

In Times Of Peace

Germans Learning Protection Methods Against Gas Attack From Air

Classes have been established in Berlin to train women in the steps

they must take for the protection of their household in the event of a gas attack from the air. Lectures are given on such subjects as how to make cellar gas proof. Branches of the "Women's Air Defence League" are being established in several centres throughout the country.

Keep Douglas' Egyptian Liniment always in the stable, ready for immediate use. Relieves pain and inflammation. Thrush or Hoof Rot, and infection of cow's teat.

Larned a Lesson

A U.S. tourist made loud complaint in Aylmer, Ontario, recently. It seems he had replenished his gas supply at a station in another town, tending a U.S. oil in payment, and received his change in good Canadian money.

On arriving at Aylmer he endeavored to exchange the Canadian money back into U.S. funds, and was most indignant when the bank demanded a discount. He learned a lesson in exchange which has been taught many a Canadian visitor to the U.S.

Exposition Of Fascism

Premier Mussolini Does Not Believe In The Possibility Of Perpetual Peace

War is exalted by Premier Mussolini as giving "the sea of nobility to peoples" in his concluding exposition of "Fascism for the Encyclopedia Italiana, which was published in his old newspaper, Il Popolo d'Italia. Perpetual peace, the premier says, is impossible.

His dictum of democracy is this: "It is a failure more tyrannical than tyranny."

"Fascism, as it generally regards the future and the development of mankind and apart from consideration of present policies, does not believe in the possibility of perpetual peace," the premier writes.

The premier reaffirms the doctrine that the state is supreme.

His view of the relation is brief: "Religion is not sufficient to re-orient in general or Italian Catholicism in particular. The state does not have a theology but a morality. Religion is not only respected but defended and protected."

Improving On Nature

Sell Heated By Electricity Can Be Kept At Even Temperature

Sol heating by electric current has come to be recognized as an aid to the growers to get their produce to market earlier and secure better prices. Equipment for heating beds, including cable and thermostats, was sold to farmers in the United States last year for the first time and several plants were set up in Canada. The bulk of the power is used between sundown and sunrise, making it practically an off-peak load.

The advantage of electric heating over steam or manure is seen in the more complete control. Flowers, such as Easter lilies can be speeded up and a greater percentage of growth is noted in cuttings of plants. Celery appears to respond particularly well to the electrical current.

Persian Balm is unrivaled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands smooth and supple. Excellent for sooth and relieve roughness or chafing caused by weather conditions. Indispensable to every woman. Contains camphor, rosemary, and lavender. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. Persian Balm is the one toilet requisite for the woman who cares for charm and elegance.

Fifteen oxen are required for a newly discovered treatment for Addison's disease.

Successful results of the treatment have been obtained at a London hospital.

Fortunately the disease which attacks the pituitary gland and stops growth is rare, for the expense of extracting one dose of serum from fifteen oxen is enormous.

The life of one patient was saved with this new treatment, but \$125 was spent on him to do it, and the treatment continued to cost \$5 a day.

Such It Is For Lame Back

A British rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring relief.

As the liniment sinks in the pain comes out and there are ample grounds for saying that it is an excellent article.

Many Placed In Employment

Saskatchewan Government Finds Job For 2,511 Persons In Five Weeks

Jobs for 2,511 persons were found by government employment offices in Saskatchewan during the five weeks ending July 30, official figures indicate. The number of persons applying for work at the nine employment offices in the province during the period were 2,926, and the number of employers' orders received were 2,637.

In addition to these figures there were 187 applications received from school teachers and 62 of these were located with positions.

The oldest cemetery in Canada is thought to be the one adjoining old Fort Anne, Annapolis Royal, Nova Scotia.

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschen Salts are appealing to girls and women who are striving for an attractive free-from-fat figure.

It is the secret that makes the salt so fat and bring into bloom all the natural attractiveness that they possess; every morning they take a half-teaspoonful of Kruschen Salt with a glass of warm water before breakfast.

They do this every morning—without missing one—for the salt is the only salt that has the taste of the salt.

It is the taste that brings the salt to the heart and brings into bloom all the natural attractiveness that they possess; every morning they take a half-teaspoonful of Kruschen Salt with a glass of warm water before breakfast.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood contains more oxygen. The salt is carried to every organ, gland, nerve, and fibre of the body, and this is followed by "that Kruschen feeling" of refreshment, energy and activity, reflected in bright eyes, clear skin, cheerful vivacity, and a charming figure.

A Warmer Climate

Scientists Predict Radical Weather Changes in the Future

Sometimes you hear people who lament the present condition of mankind express the wish that they might be living on this planet a few thousand years hence. They are afraid that there may then be more culture more altruism, more highly improved mechanics and a happier state of things all around.

But, according to the recent pronouncements of scientists, there will be great drawbacks to the enjoyment of an Edenic existence in those future days, and one of them will be a devastating flood. Dr. W. J. Humphreys, professor of meteorology of the United States weather bureau, says that with the vanishing of the last 6,000,000 square miles of ice sheets at and near the poles and in the high mountains the oceans will be raised 151 feet.

In this dismaying prediction Dr. Humphreys is supported by Professor David, of Australia; Professor Meinhard, of Germany, and others who also accept the theory of the American scientist that it's going to be pretty warm in the present temperature zones, for as the ice melts the tropics will press upon them and in turn will press upon the polar regions. —Los Angeles Times.

Miller's Worm Powders were devised to promptly relieve children who have worms. It is a simple preparation to destroy stomach and intestinal worms without shock or injury to the most sensitive system. This action is gentle and painless, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Business Is Growing

Increase In Air Passengers Between Germany and Russia

Air service between Germany and Russia continued to grow. Estimates are that "Transocean" German-American air transportation company will carry this year at least nine times as many passengers as it did in its first 12 months nine years ago. Mail, baggage and freight also have made great gains. Two services are operated, one between Berlin and Moscow, and the other from Königsberg to Leningrad. Scheduled flights have increased from two to seven times a week.

A Separate Grade For Garnet Wheat Is Sought By British Milling Interests

Continuation of the policy of marketing Garnet wheat to be mixed with Marquis and Reward varieties, or of marketing it as No. 1 and No. 2 Northern wheat will necessarily against all wheat sales from Canada, in the opinion expressed by William Smith, chief grain buyer and miller for the Scottish Co-Operative Wholesale Society.

The British miller, stated, had found the Garnet variety unusable for milling purposes in Britain. At a recent meeting of the milling and grain interests held in London a decided stand was taken which called for the special grading of Garnet wheat as distinct from the other Canadian wheat varieties.

"It is to the interest of the Canadian wheat producers to see that the Garnet variety is not marketed," stated Mr. Smith. "The British buyer of wheat is determined that when he purchases grain on the Canadian market that the commodity supplied him will be either No. 1 or No. 2 Marquis or Reward. Any purchases of Garnet variety made will only be bought on the strict understanding that it is of this variety, and at a price considerably below that paid for the other standard Canadian varieties."

Reasons given by Mr. Smith for the objection of British and Scottish millers to Garnet were that it is lacking in protein values and also that its baking qualities are strength and stability, in contrast with the Marquis and Reward varieties.

Mr. Smith was definite in his statement that he did not wish to be construed as advocating the non-growing of Garnet. "This may be the best type of wheat to grow in certain districts, but, for its successful marketing it must be labelled what it is and not be placed on the market as holding grade with the other Canadian varieties."

Unless there is a separate grade for Garnet, British millers and grain buyers will be forced to divert their purchases to other channels, and there is no assurance to them that the wheat bought will be required Marquis or Reward varieties.

With this factor said Mr. Smith, which must be considered, is that the continuance of a policy of not grading the Garnet wheat may result in definite lowering of the price of all Canadian wheat on the British markets.

Hard Task For Doctor

Valuable Snake In London Zoo To Have Glass Eye

Fitting a snake with a glass eye is the delicate operation which faces a doctor when he works on a huge Madagascar boa in a London zoo.

Some time ago this rare and valuable boa became blind in one eye. It was found that the eye was badly damaged and causing much pain.

The offending eye was plucked out, and the snake's normally good spirits returned.

But the boa had lost much in beauty. Therefore, a suitable glass eye has been selected, and will be fitted.

New Natural Gas Product

A large flow of natural gas has been struck in the Kinsella field, southeast of Edmonton, Alberta. The new producer is reported to have a flow of 7,500,000 cubic feet per day.

Professor: "Once again I have come out without my umbrella." — Mucha, Warsaw.

W. N. U. 1935

Believes Sun Spots Control Lake Level

Professor Finds Erie's Changes Follow Solar Cycle

Sun-spots control the level of Lake Erie, according to Prof. J. N. Nassau, observatory director on Cleveland, after a detailed study in co-operation with William Koski, graduate student.

Length of two years behind, the water level in the lake rises and falls with the 11½ year cycle of minimum to maximum to minimum intensity in the spots on the sun, Dr. Nassau's experiments showed.

The unusually high level of the lake in 1930 was due directly to the fact that the sun spots reached a maximum degree of intensity during 1928. Since 1930, the level has been receding annually and according to Prof. Nassau's observations, will continue to do so for at least two more years.

PROUD OF GAVEL

Mr. Stewart Young, of the Town Planning Branch of the Saskatchewan Department of Municipal Affairs, proudly displaying a gavel sent to him as Secretary of the Saskatchewan Land Surveyors Association by J. Lonsdale Doupe of Winnipeg. The gavel is made from oak grown on grounds of the pioneer home of the Inikster family at Kildonan, Manitoba.

Red Clover Seed

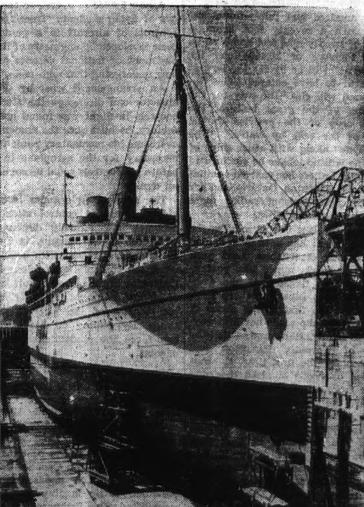

High Grade Seed Brings Three Cents Per Pound More Than Ordinary Article

According to a news report going the rounds of the press, farmers of the Stittsville (Ontario) district, recently sold a shipment of \$3,000 pounds of red clover seed which was graded and sealed as Certified, No. 1. This seed brought 3 cents per pound more than dealers were offering for ordinary No. 1, proving once more that it pays to grow the best. Watch the Stittsville men when the World's Grain Exhibition and Conference takes place at Regina next year. At this great all-Canadian, open to the world show, there are four classes for clover seed with \$6,500 in cash prizes. There are three firsts each of \$300.

Creamery Butter Production

The quantity of creamery butter produced in Canada in 1931 is the largest ever recorded by the dairy industry of Canada. It amounted to 225,000,000 pounds, an increase of about 40,000,000 pounds over the previous year. There are 2,696 dairy factories in operation in Canada.

Spring-Cleaning An Empress

Under special arrangement with the Dominion Government the Canadian Pacific Empress Liners will, in future, have their annual summer overhaul in the great drydock at Victoria, British Columbia, instead of at Hong Kong, as in the past. Our picture shows the R.M.S. Empress of Russia in drydock, the first of the Canadian Pacific Fleet to be spring-cleaned in Canada. The "Empress of Russia" is 570 feet long, with a beam of 68 feet, but she looks small in the mammoth Victoria drydock which is 1,150 feet long with a minimum width of 124 feet. The drydock has a capacity of 42,000,000 gallons yet can be pumped dry in four hours.

The Victoria dock is exceeded in size only by the Commonwealth Dock of Boston, which is 29 feet longer. The new Southampton dock is 1,200 feet long but over all is not as large as that at Victoria.

The Dominion Government, in order to bring the work to Canada granted special concessions which will result in the expenditure of some \$150,000 on labour plus the cost of material.

Additional Sites Recommended For Marking By Historic Sites and Monuments Board

Keeping Up With Others

Idea Is All Right In Matter Of Progress

In one sense we must keep up with others. Their success inspires us. A student should not let another student outdo him! And the progressive ideas of other students often lead us to better ways of living and happiness, and to better methods of living. Keep up with good sensible people!

But many prosperous people seem to have had a bad example. They spend too much money on fine houses, and expensive dress and jewelry and automobiles. You may have enough to keep up with them, but I advise you to pay no attention to their example. Have simple habits. Live in your own way, according to your own taste, and well within your means. Remember, not all "high-flyers" are able to fly so high! "Up like a rocket, down like a stick!"

It is pitiful to see some people trying to keep up with foolish people! Everybody knows they are poor, and living beyond their means. They then lose their credit and the respect of sensible people. Poverty is not a crime. No sensible rich man looks down on his poor neighbor—on the other hand, he has great respect for a sensible, industrious poor man!—J. P. Greene.

Well Known "Mrs. Grundy"

Famous Character Came Into Existence In English Play

That famous character "Mrs. Grundy" came into existence in a play called "Speed the Plough," written by Thomas Morton and produced some hundred and thirty years ago. In this play one of the characters has a habit of dragging her neighbour, Mrs. Grundy, into everything she says. At last her husband bursts out: "It is always 'What will Mrs. Grundy say?' What will Mrs. Grundy think?" Actually, Mrs. Grundy never once appears on the stages! But the constant reference to her opinions appealed to the public fancy and she still survives as a stickler for the proprieties.

The development of interest in historic sites and landmarks throughout Canada has increased greatly during the past few years, mainly as a result of the excellent work being carried out by the Board of the Interior on the recommendation of the Historic Sites and Monuments Board of Canada. The Board, which recently concluded its annual meeting in Ottawa, was formed in 1919 with the sanction of the Minister of the Interior, to advise the department on the preservation of such monuments and sites as were considered of pre-eminent national interest. The chief objects in view were the education of the nation in the history of the country, the stimulation of patriotism, the commemoration of the deeds of those who bore a significant part in the development of the country, and in addition the preservation as national property of sites having outstanding historical interest.

The first meeting was held in October, 1919, and the name "Historic Sites and Monuments Board of Canada" adopted. The Board, which is composed of eminent historians chosen with a view to having representation from all parts of Canada, is honorary in character. The recommendations of the Board are carried out by the National Parks Branch, Department of the Interior, Ottawa. Up to the present time 190 sites have been marked with a standard bronze tablet, upon which the Board's name is inscribed.

Among the sites recommended for marking at the recent meeting of the Board are those of the first iron furnace in Upper Canada, at Lyndhurst, Leeds County, Ontario; the first submarine telegraph in North America, between Prince Edward Island and New Brunswick; and the fur-trading post of Norway House at the north end of Lake Winnipeg, in Manitoba. The inauguration of the first stage route between Quebec and Montreal, and the signing of the Indian treaties made near Orillia, Ontario, are also to be commemorated.

The first iron furnace in Ontario was constructed at Furnace Falls, in the town of Lyndhurst, County of Leeds, in Wallis Sunderland, 1812, and was operated until 1812. The first submarine telegraph cable in North America was laid in November, 1852, by the steamer "Ellen Gisbourne" between Cape Tormentine, New Brunswick, and Carleton Head, Prince Edward Island. Treaties made with the Indian tribes in 1798, 1815, and 1818, which transferred to public control the ancient country of the Hurons lying north and west of Lakes Simcoe, will be commemorated with a suitable marker at Orillia, Ontario. The importance of Norway House in the early history of Canada will be perpetuated with a marker reviewing the chain of events connected with the famous fur-trading post in Manitoba.

New Pastime For Blind

Invention Enables Sightless Persons To Do Crossword Puzzles

A London doctor has made an invention whereby the blind can do crossword puzzles and acrostics. The inventor is Dr. F. W. Alexander, a former medical officer, and the inspiration came to him as he passed a laundry.

The invention is based on the Braille reading system for the blind, and is composed of a laundry board studded with nails denoting groups of the alphabet. Numerous games can be played on this device.

CARTER'S LEEPIPS

WORLD HAPPENINGS BRIEFLY TOLD

The Rutherglen dock, one of the largest on the Clyde, has been temporarily closed account of decline of shipbuilding.

Dividend on the common stock of Canadian Pacific Railway for the first six months of 1932 is not being paid at present.

The Church of Scotland plans to build 20 churches in Scotland in the next seven years, 10 of which will be in Edinburgh and five in Glasgow.

Representatives accompanying the Japanese Olympic team plan to buy the cabin of each athlete from that country who wins an Olympic title.

Newton Mass., one of Boston's wealthiest suburbs, has nearly two automobiles for every family. There are 14,000 families and 23,000 automobiles.

Florenz Ziegfeld, New York theatrical producer, who died recently in California, bequeathed his whole estate to Billie Burke, his widow, and their daughter.

An air-taxi was chartered from Imperial Airways by a London woman for a return flight to Chelmsford, Essex, where she placed a wreath on a grave in the churchyard.

Art and agriculture are the only creative professions in the world, said John Erskine, novelist. "By artists I mean all craftsmen who are creators," he said. "And by agriculturists I mean all those who produce and create wealth from the soil."

San Francisco's new \$6,000,000 open house, the first and only municipality-owned opera house in the United States, will be formally dedicated next month as a war memorial. It will open Oct. 15, with performance of Puccini's "Tosca."

Indicative is it, said of an improved lumber outlook, is the protest filed with the British Columbia government by mill men against export of logs. Loggers, however, contend that they are in a position to satisfy all demands of the mill men as taking care of any export trade being offered.

Britain's Unemployed

Seven and a Half Million People Depending On Government Aid

A wandering army of unemployed youths, vaguely reminiscent of the United States bonus army, is making its appearance in Great Britain as a result of increased the number of jobless announced as 2,811,792.

Unemployment is now approximately one-fourth of Britain's 15,000,000 population dependent to some extent on government aid, for only 7,500,000 men, women and children are existing wholly or partly on government or local relief in addition to the official total of jobless.

As a result of the latest official figures, an increase of 84,433 in the month of July, and of 96,432 in the last year, the nation's relief machinery is scarcely able to cope with the situation.

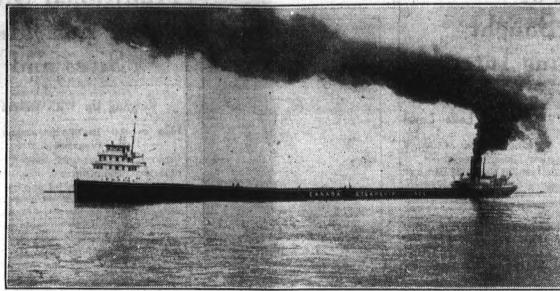

A material that does not stop the ultra-violet rays from the sun, resembling glass, and not as fragile, has been made from natural gas.

W. N. U. 1955

WORLD'S RECORD WHEAT MOVEMENT MARKS WELLAND CANAL OPENING

Carrying 575,000 bushels of western wheat, representing the product of over 41,000 acres of prairie land and the largest single cargo ever carried in any single ship on any sea, the giant S.S. Lemoyne, of Canada Steamship Lines, 633 feet long and the biggest vessel on freshwater, opened the Welland Canal officially on August 6 in the presence of His Excellency, the Governor-General, Rt. Hon. Stanley Baldwin, and the delegates to the Imperial Conference, Premier R. B. Bennett, members of the Cabinet and thousands of spectators.

Largest Grain Carrier

Boat That Is the Pride Of Canada's Inland Waterways

World's largest grain carrier, holder of all Great Lake freight records and pride of the inland waterways, the S.S. Lemoyne of the Canada Steamship Lines fleet, officially opened the new Welland Ship Canal on August 6. Officiating at the ceremony was His Excellency the Earl of Bessborough, Governor-General of Canada, and delegates from all parts of the Empire attending the Imperial Conference in Ottawa.

Designed and built by Canadian Steamship Lines in their own shipyards at Midland, Ontario, in 1926, the "Lemoyne" is considered a triumph of Canadian achievement and is the boast of Canadian shipbuilders. Since she first took the water she has captured all the major honors of the Upper Great Lakes freight carriers.

Her records go even beyond freshwater for she has carried in single cargoes more grain and more coal than has ever been moved in any other single ship.

In 1929 the "Lemoyne" took on a cargo of 571,885 bushels of wheat, the crop of approximately 40,000 acres or more than 62 square miles of land. In May 1930 she established a world record for the carriage of coal by taking aboard 16,538 tons and carrying it to Fort William. It required more than 300 railroad cars to bring this cargo to the ship.

Six hundred and thirty-three feet long with a seventy-foot beam, a depth of twenty-nine feet and a registered tonnage of 10,480 tons the "Lemoyne" will be by far the largest ship ever to have entered Lake Ontario and will clear the way for the carrying of the great bulk of the wheat crop of the prairies to the ports of the east by water. The "Lemoyne" along with other ships of her type will no longer be confined to the Upper Lakes; her eastern terminus became Kingston, Ontario, and her east to west crossing radius more than one thousand miles.

During the last twelve months the Welland Canal has seen a series of new records established. Last year the S.S. Noronic, upper lake passenger liner and flagship of the Canada Steamship Lines, northern fleet, established the first of the series of records when she made her first voyage into Lake Ontario and visited the ports of Toronto, Hamilton and Kingston for the first time. On that occasion over one hundred thousand people from these three cities went on board the "Noronic" and the walls of the canal were lined with thousands of people during her historic cruise. The "Noronic" at that time was the largest vessel of any type to go through the canal and remains the largest passenger steamer to have ever passed through it.

As a result of the latest official figures, an increase of 84,433 in the month of July, and of 96,432 in the last year, the nation's relief machinery is scarcely able to cope with the situation.

A material that does not stop the ultra-violet rays from the sun, resembling glass, and not as fragile, has been made from natural gas.

Following the establishing of this record by the "Noronic," giant upper lake freighter of the Canada Steamship Lines set three new marks for the canals in a little over a week. Early in July this year the freighter "Ashcroft" went through the canal with 360,000 bushels of wheat on her way to Kingston only to see her record broken within a few days by the freighter "Gleneagles" with 380,000 bushels. Both these vessels had formerly been confined to the Upper Lakes.

Safe-breaker at home: "I should hate to open my own safe any other way."—Musket, Vienna.

Less than a week after the "Qien-

gales" had set her new record for grain she returned to Lake Erie and brought down to Hamilton 12,910 tons of coal, another Welland Canal record which will likely stand for some time. On her latter trip the "Gleneagles" also shattered all records for cargo carried into the port of Hamilton.

Today the "Gleneagles" is the largest ship to have entered Lake Ontario, but compared to the "Lemoyne" she is a small freighter. Her length of 596 feet compared with the "Lemoyne's" 633 feet and her capacity is approximately 380,000 bushels compared with the "Lemoyne's" 571,885 bushels.

Considered of special importance to the Empire since the Welland Canal will be the route used by most of Canada's grain ships, it was decided some time ago that the official opening should be on the programme of the Imperial Conference and efforts were immediately made to have the largest Canadian lake boat go through the canal. This arrangement was made for the welcoming of the "Lemoyne" to Port Coborne on her first voyage and that in addition to delegates, government officials and representatives from other provinces large crowds of people viewed the ceremony.

Testing Out New Device

Invention May Prevent Flying Students From Freezing Controls

A new device to overcome the danger of flying students "freezing" the controls of aircraft in a panic has been developed by engineers of the department of national defence and is now undergoing thorough tests.

An arrangement whereby the instructor can disengage the student's controls in flight was found unsafe, factory, because once the student had overcome his momentary panic it was necessary for the aeroplane to land before his controls could be connected again.

The new principle under test provides a jointed control stick that becomes automatically disconnected when too much pressure is applied to it, and yet resumes its usefulness when the student's grip relaxes. The instructor in the other cockpit is provided with a normal control stick and has control of the aircraft at all times. By pulling on his stick he can force the student's control out of joint.

Limit To Cattle Exports

Less Than 25,000 Head May Be Shipped To England Next Year

Less than 25,000 head of cattle would be shipped to the United Kingdom next year from Canada, even if the restriction now imposed against Canadian cattle landing in Britain were lifted. This estimate was made in an interview recently by Hon. Robert Weir, Canadian Minister of Agriculture.

Reports which have gone out that the lifting of the restrictions would result in Canada shipping from 100,000 to 400,000 head annually to Britain are regretted by Mr. Weir. These reports would tend to fill the British market with fear that his home market would be flooded by Canadian cattle, while no such danger really exists.

In ancient Babylon, medicines were frequently mixed in beer.

SUNDAY SCHOOL LESSON

AUGUST 21

THE TENT OF MEETING

Golden Text: "Jehovah spake unto Moses face to face, as a man speaketh unto his friend."—Exodus 33:11.

Lesson: Exodus, chapters 32, 33.

Devotional Reading: Psalm 5:1-7.

Explanations and Comments

The Place and Purpose of the Tent Of Meeting, verse 7-11. These verses describe the extraordinary way in which Moses performed his high priestly service during the wilderness life, before the tabernacle was erected. At every moment someone would be

holding the "tent" by the "Tent of Meeting," which he called the "Tent of Meeting," and would enter it by the door of the camp. Similarly, after the settlement in Canaan, the local sanctuaries were beyond the towns and villages. The tent was especially used because the tent and its tabernacle might come into his perplexities and receive an answer from Moses as priest. When his duties were over, he would return to the tent, and the tent was constantly guarded by his assistant, a young man named Joshua.

Moses had tarried on Mount Sinai; the people had complained to Aaron that, "as for this Moses, the man that brought us up out of the land of Egypt, we wot not what has become of him," and this new arrangement was better for the people, for they could follow him with eyes till he came back to the Tent. When Moses was the pillar of cloud, the symbol of the Divine Presence, hover over the door of the Tent, each man, sitting and watching, would be up and worship. And Jehovah spake with Moses.

"Prayer is more than meditation; it is communication; it is a dialogue, not a monologue. It is not enough that man speak to God; he must believe that God can hear and, in some way, speak to him."—A. A. Milne, one of the most welcome and inspiring features of the Bible is that it is even more full of God's speech to man than of man's to God.—John E. McFadden.

Within the "Tent of Meeting" Jehovah spoke unto Moses face to face, and Moses spoke unto Jehovah. The expression "spoke face to face" has become proverbial for intimate converse. It is an interesting and profitable exercise, as Dr. John E. McFadden says, to let one's own Hebrew mind gradually transgress its earlier limited conceptions of God. "Sometimes the higher meaning of the word 'God' is to be found within the same chapter. A profounder view than in verse eleven occurs few verses farther on. 'Thou shalt not see Me and live.' A still more revealing spiritual view occurs in Deuteronomy 4:12-16, where it is urged with great insistence in proportion to popular conception, 'Ye shall not see Me and live.'"

"Prayer is the psychological act by which the soul comes into conscious contact with God."—Robert F. Horner.

"We have too little praying face to face, we have very little face to back at the end. I think these will be great grief for our sins of omission—omission to get from God what we may have had by prayer."—Andrew Bonar.

According To Supply

The doctor was giving a lecture to a class of girls.

"Also," he remarked, "it has been found that the human body contains sulphur!"

"Sulphur!" exclaimed a pretty young girl. "And how much sulphur is there in a girl's body?"

"Oh, the amount varies," said the doctor smilingly, "according to the girl."

"Ah," remarked the girl. "That's why some of us make better matches than others."

Stops Summer Odors-

The heavy smell which warm weather brings to many people is largely prevented by regular bathing with a free lather of Baby's Own Soap.

The delicate aroma disperses all unpleasantness and the skin feels refreshed, cool and sweet.

Baby's Own sells at 10c. a cake at dealers everywhere.

"Best for you and Baby too!"

Naval Armaments

Difficult To Distinguish Between Defensive and Offensive Weapons

Why all this bother about "offensive" and "defensive" naval weapons at Geneva? In the submarine offensive? Are battleships, mine-layers and bombing planes defensive?

There is one simple rule by which every can be decided. The other fellow's weapon is extremely offensive, your own is purely defensive.

Ask any schoolboy or baseball fan.

The humble pop bottle is the most innocuous of objects, quite ineffective. Only prejudiced persons like the umpire could possibly construe it as offensive. Again take the pea-shooter. Who ever heard of a pea-shooter that used this mild little weapon for attack? As any boy knows, the uses of the pea-shooter, like the water-pistol, are solely for the warding off of attacks by others, especially those armed with pea-shooters.

And so it is with submarines and the like. The gentle U-boat regarded the Q-boat as highly offensive, whereas we all know it to have been purely protective. During the war, some of us harbored hard thoughts about submarines. Quite unjustly, it now seems, according to the French and Japanese thesis. The under-sea boat has become the Poor Nation's Armor. It is the cheapest naval weapon for frightening off aggressives, according to its backers.

The sad truth is quite evident. Weapons are defensive or offensive according to the uses to which they are actually put. When you have decided who is the offender, and who is on the defensive, then, perhaps, you may decide whose weapons are offensive. Meanwhile, most nations seem to proceed on the principle that if a club is defensive, three clubs and a machine gun are twice as defensive as a single club.

—Montreal Star.

Make Interesting Discovery

Canadian Scientists Gain Knowledge Of Universe Of Great Importance

New knowledge of the universe, stated to be of tremendous potential importance in the scientific world, has been gained by Prof. J. S. Foster and Dr. A. Vibert Douglas, McGill scientists who returned to the university following a month's research work conducted at the Dominion Astrophysical Observatory at Victoria.

Professor Foster declined to claim full success for their achievements until he and Dr. Douglas had had time to re-study their findings. He said, however, that the results of their work would quite likely create an upset of opinion among European scientists.

The two McGill scientists set themselves to examine the electrical fields of stars.

They conducted observations both at Victoria and at Pasadena, Calif. Only one day was spent at the latter place.

"What's that you're putting in your shirt pocket?" asked Murphy.

"Dynamite," whispered Donovan. "I'm waiting for Casey. Everytime he meets me he slaps me on the chest and breaks my pipe. Next time he does it he'll blow his hand off."

CANADA'S SHARE OF BRITAIN'S WHEAT IMPORTS

Ottawa, Ont.—During the calendar year 1931 Russia supplied the United Kingdom with 24.24 per cent. of its total wheat requirements while Canada's percentage was slightly higher at 25.12. These figures were contained in a special report on world trade in wheat, issued by the Dominion Bureau of Statistics, especially for the benefit of the Imperial Economic Conference. Russia's total exports of wheat to the United Kingdom in 1931 amounted to 64,010,298 as compared with total Empire imports to the United Kingdom of 94,948,376.

The total wheat requirements in 1931 of the United Kingdom, chief wheat importing country of the world, amounted to about 223,000,000 bushels. This was supplied mainly as follows: Canada, 55,901,000; bushels; Australia, 43,397,000; British India, 89,100; other British countries, 73,656; Russia, 54,010,298; Argentine, 38,701,714; United States, 15,576,000; Germany, 4,283,000; France, 35,000; and other foreign countries, 9,875,000.

Russia's upsetting invasion of the Empire wheat market came in the last two years, the total to the United Kingdom for 1930 having been only \$4,039,000 bushels, while the five-year average ending with that year was 8,753,000 bushels. This compares with a five-year average over the same period of 78,194,600 for Canada.

Estimated gross average yearly British exports of wheat for the five years ended with 1930 amounted to \$30,166,000 bushels. Canada which leads all wheat exporting countries had an average total of 257,863,000 bushels.

Estimated average world exports during the same period totalled 692,640,000 bushels. Argentina led among the foreign countries contributing to this total with an average of 149,785,696 bushels, with United States, Hungary, Algeria, Germany, Rumania, France and Russia, following next in order. Russia's average was 31,068,300 bushels.

Kaye Don Will Race Again

Britain's Speedboat Racer Has Hope Of Capturing Trophy

London, Eng.—Kaye Don, Britain's speedboat racing idol and holder of a new world's record upon the water, left here for Southampton to sail on the steamer "Majesty" for Detroit where he will race against Gar Wood for the Harmsworth trophy.

A large crowd of cheering admirers bade him well.

"I'm making no promises," he said, "except this: I will do the best I can against Wood's boat, which has a much greater horse-power than my Miss England III."

By promising to do the best he can, Don meant he would try to reach again on the new Detroit course the two-miles-a-minute pace set when he slashed his shellscased power plant across Loch Lomond at an average speed of 119.81 miles an hour, with a top mark of 120.5 miles, the fastest any human has travelled over the water.

Optimistic At Eighty

Man From Ontario Quite Confident Of Finding Work

Winnipeg, Man.—Flat broke and 80 years of age, an optimistic traveller arrived in Winnipeg from Brantford, Ont. He visited the city hall and said he had ridden bumpers here in search of work in the harvest fields. He was not exactly looking for a meal ticket at the city hall, he said. He just wanted to look in and talk to some of the folks.

A blacksmith by trade, he said he had never missed a meal in his life and did not expect to. He was sure he'd find something to do in the west after the harvest.

Alberta Delegates

Edmonton, Alberta.—Hon. George Hoadley, Minister of Agriculture, and Dean Howes of the university, will be the Alberta delegates to the meeting called by Hon. Robert Weir, federal minister of agriculture, for August 29 in Toronto.

W. N. T. 1935

No Dairy Shipments

Lack Of Refrigeration Service May Prevent Exports Over Churchill Route This Year

Montreal, Que.—Owing to the high little hope is held out that a refrigeration service will be available out of the port of Churchill, Man., to carry butter and cheese to Great Britain, at least this year, Thomas Harding and Co., steamship agents here, stated recently.

Efforts had been made by western Canadian interests to obtain steamship service from the northern port for dairy products, the company stated, but it was felt the rates would be too high to attract shippers. Vessels at present using the Hudson Bay route to carry grain do not have the refrigeration facilities necessary.

Western Canada last year shipped a considerable quantity of butter to the United Kingdom when exports of that commodity were resumed after a lapse of several years. Certain quantities of eggs and poultry are also shipped overseas by the west, the shipments being made via Montreal.

Winnipeg, Man.—Officials of the on-to-the-Bay Association had little comment to make on a Montreal press dispatch, saying it would be practically impossible to ship dairy products from Churchill this year owing to the high shipping rates. They regarded the statement as indicative of the difficulties encountered in developing the new route. Ample dairy produce was available in the west for export to ensure profitable operation of a refrigerated ship on a reasonable freight rate basis, it was stated.

National Research Laboratories

Two Thousand Guests Attend Official Opening At Ottawa

Ottawa.—The handsome, bronze doors of Canada's new national research laboratories swing open to 2,000 guests from the British Empire. Between the doric columns of the main facade light shone from half-a-hundred windows.

His Excellency the Governor-General faced one of the most distinguished audiences in Canada as he pronounced the words declaring the building formally opened.

Hon. H. S. Stevens, Minister of Trade and Commerce for Canada, presided. Speaking briefly, he called upon the Prime Minister, Rt. Hon. R. B. Bennett, to address the assemblage. After a short address from Mr. Bennett, his excellency, upon whom fell the duty of declaring the building open, spoke.

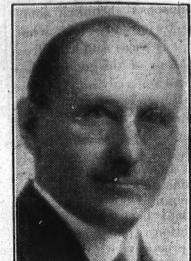

Enlarging Elevator

Winnipeg, Man.—The United Grain Growers, Limited, have awarded a \$250,000 contract to the National Construction Company, of Vancouver, for the extension of their elevator to a capacity of 2,000,000 bushels, the work to be completed by November 1, according to an announcement of R. S. Law, president of the firm here. The present capacity of the elevator is 1,600,000.

Shoud's Attentive

St. Thomas, Ont.—Representation of the Dominion of Canada's 100th rifle unit, a battalion of great war veterans, at the unveiling of the Canadian memorial at Vimy Ridge, which may take place next year, was recommended by Col. Hercule Barre, Canadian trade commissioner to France.

ADDRESSES SEED GROWERS

Under the auspices of the Canadian Seed Growers' Association, Fall Days are being held this month at various points throughout Saskatchewan. Mr. H. S. Vigor, Secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

War Loan Conversion

British Plan Is Attended With Success According To Report London, Eng.—The success of Great

Britain's war loan conversion is strikingly illustrated in the official report of government revenue and expenditure for last year, from which it is inferred that nearly £1,600,000,000 out of the total of £2,084,994,000 was converted by July 31.

The report includes an item of expenditure, "cash bonuses, £15,703,000 sterling." When the government announced its conversion scheme on June 30, where five per cent. securities could be exchanged for a 3½ per cent. issue, bondholders were offered a cash bonus of £1 for each £100 if they gave notice of intention to convert before July 31.

While no official announcement of the progress of the scheme was issued, London financial houses were quick to observe the cash bonus item, multiplying it by 100 to find the figure converted in July.

Cholera is spreading in the district and the people are hoarding food as prices sky-rocket.

Wheat For Italy

Shipment Being Forwarded Direct Through Port Of Churchill

Winnipeg, Man.—A shipment of wheat will go to Italy this summer direct from the port of Churchill. Thomas Harling, St. head of Thomas Harling and Son, shipping agents, made the announcement here just before he left for the northern port to superintend the loading of the first two ships of the season, the "Penny" and "Sierentz."

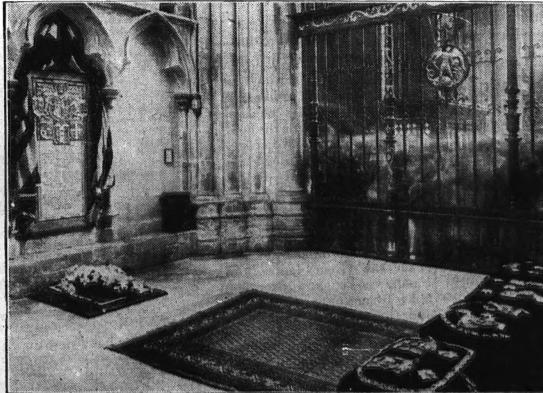

Mr. Harling said the chartering of a vessel for the shipment to Italy indicated the Hudson Bay route was appropriate for grain importers as far as to Great Britain. The ships will carry the first cargo to go direct from Churchill to the continent. The three vessels already chartered will carry about 150,000 bushels of wheat.

The fine, sensitive, golden hairs for a hygrometer, a delicate instrument used for recording humidity changes from hour to hour. The hair of Brunettes is too coarse.

Shoud's Attentive

St. Thomas, Ont.—Representation of the Dominion of Canada's 100th rifle unit, a battalion of great war veterans, at the unveiling of the Canadian memorial at Vimy Ridge, which may take place next year, was recommended by Col. Hercule Barre, Canadian trade commissioner to France.

WHERE A NOTED WARRIOR RESTS

The grave of Field-Marshal Lord Plumer in Westminster Abbey, showing four cushions on which are placed his insignia. Lord Plumer's remains lie close to those of the "Unknown Warrior." The tablet shown at the left background reads in part: "To the Glory of God and to the Memory of One Million Dead of the British Empire who Fell in the Great War of 1914-1918."

Double Taxation

Steps Being Taken To Remedy Grievous Situation

Edmonton, Alberta.—Recommendations from the conference of income tax officials of the four western provinces, which was held here, will go in course to their respective governments, to attain general principles and working methods having been agreed upon for joint adoption if approved. It is expected that the changes will be made to apply to next year's tax.

Provincial income taxes as affecting wage-earners are the chief point on which some changes in the present system are desired. The superintendents of the four provinces are trying to find a way of avoiding the taxing of the same income twice. A number of cases were found in this year's operations of persons living in one province and working in another, and under the income tax laws as they stand at present the incomes of such persons are taxed twice, once in each province. This overlapping and double taxation will be remedied, it is understood, if the suggestions of the superintendents' meeting are adopted.

Floods Take Heavy Toll

Hundred Thousand Chinese Homeless and Many Lives Lost

Harbin, Manchuria.—A hundred thousand Chinese residents of Harbin were forced by unprecedented floods to abandon their homes in the city, with many homeless a year later.

Approximately 3,000 persons were reported missing in the valley of the Shanghai River, which has risen far above the level in 1914, when Manchuria experienced the worst flood in its history.

Harbin's Chinese residents have congregated in cemeteries and fields on the outskirts of the city. Many of them are without food, clothing and shelter.

Cholera is spreading in the district and the people are hoarding food as prices sky-rocket.

Quest For Blondes

Scientists Require Golden Hairs For Recording Humidity

Montreal, Que.—The McGill University weatherman's quest for blondes whose tresses reach their waists brought quick response Wednesday. Telephone calls assured him there are still women in Montreal with hair unbrushed and who are willing to sacrifice a few hairs of it on the altar of science.

The McGill meteorologist requires the fine, sensitive, golden hairs for a hygrometer, a delicate instrument used for recording humidity changes from hour to hour. The hair of brunettes is too coarse.

Shoud's Attentive

St. Thomas, Ont.—Representation of the Dominion of Canada's 100th rifle unit, a battalion of great war veterans, at the unveiling of the Canadian memorial at Vimy Ridge, which may take place next year, was recommended by Col. Hercule Barre, Canadian trade commissioner to France.

PREFERENTIAL TARIFF ASSISTS EMPIRE TRADE

Ottawa, Ont.—Preferences granted by Canada to Empire countries amounted to \$30,000,000 during the year ended March 31, 1931, according to the preliminary trade report just issued. This was estimated as the difference between the duty collected under the preferential tariff and what would have been collected under a general tariff. The difference between the preference and treaty tariffs would have been six million dollars less.

Total Empire imports for the year under the preferential tariff amounted to \$14,158,195. The duty collected amounted to \$19,125,220, at an average ad valorem rate of 13.5 per cent. The average ad valorem duty for this volume under treaty tariff would have been \$12,840,989, and under a general tariff \$19,203,030. Of the total imports goods valued at \$37,151,666 entered Canada free.

The great bulk of these imports came from the United Kingdom, the total being \$35,365,805, of which \$18,288,420 represented free imports. Duty collected on United Kingdom imports amounted to \$15,437,744. Under a treaty tariff this would have been \$23,737,060, and under a general tariff, \$28,882,152.

The next largest importer to Canada, the British West Indies, sent goods valued at \$13,563,762, of which \$8,745,705 was dutiable, bringing a revenue of \$1,366,476.

Under a treaty tariff this would have been \$7,072,931, and under a general tariff, \$7,147,446.

Increased Acreage

Prairie Provinces Have More Than Million More Acres Under Crop This Year Than Last

Ottawa, Ont.—The prairie provinces have 1,042,278 more acres under wheat this year than last, according to a crop report issued by the Dominion Bureau of Statistics Wednesday, August 10.

For all Canada, the increase is 984,350 acres.

The estimates of the areas sown to the principal grain crops in the three prairie provinces as shown by the annual statistics collected in June last through the rural schools are now available. The figures reveal an increase of 1,042,278 acres (four per cent.) in wheat, and 221,033 acres (24 per cent.) in oats, with slight decreases in barley and rye and a rather drastic reduction of 28 per cent. in flaxseed acreage from 615,361 to 445,700 acres.

Jobless Veterans Offer Services To Bolivia

British Soldiers Would Join In Fight Against Paraguay

London, Eng.—Many unemployed war veterans called at the Bolivian legation and consulate general here in response to an announcement of the British Fascisti that a large number of British Fascisti were anxious to join the Bolivian army in its dispute with Paraguay. They were courteously informed, however, that recruits were not needed at present.

The consulate-general said it had received hundreds of letters from men desiring to offer their services, in addition to a "British Fascisti" offer of 10,000 men if necessary.

Menace To Health

Dental Authority Says Sugar and White Flour Injurious To Teeth

Toronto, Ont.—The corner candy store is a greater menace to public health than the old corner saloon, according to Dr. Martin Dewey, New York, president of the American Dental Association.

Asked for an interview during the dental convention he is attending here, Dr. Dewey said, "Just say this—it has been said a million times but it will stand plenty of repetition—white flour and white sugar are the big enemies to the teeth of civilized peoples. Those are the spirits which are responsible for more ill-health as far as teeth are concerned than any two articles you could mention."

For Creamed
SOUPS and SAUCES

If you have not tried St. Charles Milk you will be surprised at the important flavor it gives to cream soups and sauces. It is the best evaporated milk and with it you can make hundreds of dainty dishes that you and your family will enjoy.

Always ask for St. Charles by name and then you can be certain that you are obtaining the best evaporated milk.

CHAPTER XXVIII.—Continued

"Oh, yes, she did. It was quite clear in the afternoon when she started—looked like being a lovely night."

"But—but—"

Nick stammered and came to a halt. There was a look of bewilderment in his eyes.

"But who's she gone with?" he demanded at last. "I thought she said she intended stopping the night with Judith and Burke at their bungalow?"

"So she did," replied Blaise. "Why? Have you any objection?"—smiling.

"No. Only—Nick frowned. "I don't quite understand it. Judith isn't on the Moor."

"Not on the Moor?" broke simultaneously from Lady Anne and Blaise.

"How do you know, Nick?" added the latter gravely.

"Why, because—"Nick's face wore an expression of puzzled concern—"because I saw Judith in Newton Abbott late this evening."

Blaise leaned forward, a sudden look of concentration on his face.

"You saw Judith?" he repeated.

"What time?"

"It must have been nearly eight o'clock. I was buzzing along in Jim Cresswell's car to catch the seven-forty-five up train and I saw Judith with one of the Holfords—you know, those people from London—turning into the gateway of a house. I expect it was the place the Holfords are staying at. They didn't see me."

"You're quite certain? You've made no mistake?" said Blaise sharply.

"Of course I've made no mistake. Think I don't know Judy when I see her? But what's the meaning of it, Blaise?"

Blaise rose to his feet, tossing the stump of his cigarette into the fire.

"I'm not sure," he said slowly. "But I'm going to find out. Mademoiselle" turning to his mother—"did Jean tell you exactly what Judith said when she rang her up on the phone about this moonlight plan?"

"It wasn't Judith who rang up," replied Lady Anne, a faint, ingenuous showing itself in her face. "It was Geoffrey who gave the message."

Tormair looked at her with a sudden awoken expression in his eyes. There was dread in them, too—real dread. The expression of a man who, at all costs, sees the thing he values more than anything in the whole world being torn from him—dragged forcibly away from the shelter he

could give into some unspeakable darkness of disaster.

"That settles it," he pressed his finger against the bell-push and held it there, and when Balnes came hurrying in response to the imperative summons, he said curtly: "Order me a fresh horse round at once—at once, mind. Tell Harding to saddle Orion and to look sharp about it."

"Blaise—Lady Anne's obvious uneasiness had deepened to a sharp anxiety—"Blaise, what are you going to do? What—what are you afraid of?"

He looked her straight in the eyes. "I'm afraid of just what you are afraid of, mademoiselle—of the devil let loose in Geoffrey Burke."

"And—and you're going to look for her—Jean?"

"I'm going to find her," he corrected quietly.

Gravity had set its seal on all three faces. Each was conscious of the same fear—the fear they could not put into words.

"But why do you take Orion?" asked Nick. "The little thoroughbred mare—Redwing—would do the journey quicker and be lighter of foot over any marshy ground on the Moor."

"Orion can go when he chooses," returned Tormair. "And he'll choose tonight. Redwing is a little bit of a thing, though she's game as a pebble. But she couldn't carry two."

The significance of Tormair's choice of his own room-bred thoroughbred and standing sixteen hands, came home to Nick. He nodded without comment.

Silently he and Lady Anne accompanied Blaise into the hall. From the gravelled drive outside came the impatient stamping of Orion's iron-shod hoofs. Just at the last Lady Anne clung to her son's arm.

"You'll bring her back, Blaise?" she urged, a quiver in her voice.

"I'll bring her back, madonna," he answered quietly. "Don't worry."

A minute later he and the great roan horse were lost to sight in the darkness of the night. Only the beat of galloping hoofs was flung back to the two who were left to watch and wait, muffled, and vague through the shrouding mist like the sound of a distant drum.

CHAPTER XXXIX.

The Golden Hour

Orion had fully justified Blaise's opinion of his capabilities. As though the great horse had gathered that there was trouble abroad to which he must not add, he had needed neither whip nor spur as he carried his master with long, sweeping strides over the miles that lay between Staple and the Moor. He was as fresh as paint, and the rush through the cool night, under a rider with hands as light as a woman's and who sat him with a flexible ease, akin to that of a Cossack, had not disturbed him in the very least.

Now they were climbing the last long slope of the white road that approached the bungalow, the reins ready to loosed on Orion's neck.

The mist had lifted a little in places, and a watery-looking moon appeared through the clouds now and again, throwing a vague, uncertain light over the blurred and sombre moorland.

Tormair had no very definite plan of campaign in his mind. He felt convinced that he should find Jean at the bungalow. If, contrary to his expectation, she were not there, no anyone else to whom he could apply for information as to her whereabouts, he would have to consider what his next move must be.

Meanwhile, his thoughts were pre-occupied with the main fact that he had failed to return home. If she had accepted Burke's invitation to the bungalow, believing that Judith and the Holfords would be of the party, how was it that she had not at once returned when she discovered that for some reason they were not there?

Some weeks ago—during the period when she was definitely investigating the possibilities of an "unexploded bomb"—it was quite possible that the queer redoubtable which sometimes tempts a woman to experiment in order to see just how far she may go, the mysterious delight that the feminine temperament appears to derive from dancing on the edge of a precipice—might have induced her to remain and have tea with Burke, chaperon or no chaperon. And then it

was quite on the cards that Burke's lawless disregard of anything in the world except the fulfillment of his own desires might have enthralled the rest, and he might have detained her at the bungalow against her will.

But Blaise could not believe that a "tete-a-tete" talk with Burke would hold any attraction for Jean now—not since that day, just before the visit to London, when he and she had been discussing the affairs of Nick and Claire and had found, quite suddenly, that their own hearts were open to each other and that with the spoken word, "Beloved," the misunderstanding of the past had faded away, to be replaced by a wordless trust and belief.

But if "had" attracted her—if knowing precisely how much the man she loved would condemn—she had still deliberately chosen to spend an afternoon with Burke, why, then, Blaise was satisfied with a swift pang that she was no longer his Jean at all than some other, lesser woman. Never again the "little comrade" whose crystalline honesty of soul and sensitive response to all that was sweet and wholesome and true had come into his scarred life to jewel its arid places with a new blossoming of rose of love.

He tried to thrust the thought away from him. It was just the kind of thing that Nesta would have done, playing off one man against the other with the innate instinct of the born coquette. But not Jean—not Jean of the candid eyes.

Promised, through the thinning mist, Tormair discerned the sharp turn of the track which branched off from the road towards the bungalow, and quickening Orion's pace, he was soon riding up the steep ascent, the moonlight throwing strange, confusing lights and shadows on the wet surface of the ground.

Suddenly, without the slightest warning, the roan snorted and wheeled around, shying violently away from the off-side bank. A less good horseman might have been unseated, but as the big horse swerved Tormair's knees gripped against the saddle like a vice, and with a steading word he faced him up the track again, then glanced keenly at the overhanging side of the roadway to discover what had frightened him.

A moment later he had jerked Orion to a sudden standstill, leapt to the ground and, with the reins over his arm, crossed the road swiftly to where, clad in some light stuff that glimmered strangely in the moonlight, lay a slender figure, propped against the bank.

"Blaise!" Jean's voice came weakly to his ears, but with a glad note in it of immense relief that her witness to some previous strain.

In an instant Tormair was kneeling beside her, one arm behind her shoulders. He helped her to her feet and she leaned against him, shivering. Feeling in his pockets, he produced a brandy flask and held it to her lips.

"Drink some of that!" he said. "Don't try to tell me anything yet."

The raw spirit sent the chilled blood racing through her veins, putting new life into her.

"A faint tinge of colour crept into her face.

"Oh, Blaise! I'm so glad you've come!" she said shyly.

"So am I!" he returned grimly.

At last, bit by bit, she managed to give him a somewhat disjointed account of what had occurred.

"I think I must have been stunned a little when I fell," she said. "I can't remember anything after stepping right off into space, it seemed. Till ages afterwards—I found myself lying here. And when I tried to stand, I found I'd hurt my ankle and that I couldn't put my foot to the ground. So—"with a weak little attempt at laughter—"I just sat down again."

Blaise gave vent to a quick exclamation of concern.

"Oh, it's nothing, really," she reassured him hastily. "Only a strain. But I can't walk on it." Then, suddenly clinging to him with a nervous dread: "Oh, take me away, Blaise—take me home!"

"I will. Don't be frightened—there's no need to be frightened any more, my Jean."

"No, I know. I'm not afraid now."

But he could hear the sob of utter nerve stress and exhaustion back of the brave words.

"Well, I'll take you home at once," he said cheerfully. "But, look here, you've no coat on and you're wet with mist."

"I know. My coat's at the bungalow. I'm in a hurry, you see"—whimsically. The irrepressible Peter-pan element, game to the core, was reasserting itself.

"Well, we must fetch it—"

"No! No!" Her voice rose in hasty protest. "I won't—I can't go back!"

"Then I'll go."

"No—don't!" Geoffrey might be there—"

"So much the better!" grimly. Tormair's hand tightened fiercely on the hunting-crop he carried. "But he's most likely lost his way in the mist and fetched up a few miles away. Probably—with a short laugh—"he's still searching Dartmoor for you. You'd be on his mind a bit, you know! Wait here a minute while I ride up to the bungalow—"

But she clung to his arm.

"No, no! Don't go! I—can't be left alone—again."

The fear was coming back to her voice and again, detecting it, abandoned the idea once.

"All right, little Jean," he said reassuredly. "I won't count you—stripping it off. There—like that." He helped her to it and fastened it with deft fingers. "And now I'm going to get you up to Orion and we'll go home."

"I shall never get up there," she observed, with a glance at the roan's great shoulders looming through the mist. "I shan't be able to spring—I can only stand on one foot, remember."

Blaise laughed cheerfully.

"Don't worry. Just remain quite still—standing on your one foot, you poor little lame duck!—and I'll do the rest."

She felt his arms release its clasp of her, and a moment later he had swung his leg across the horse and was back in the saddle again. With a word to the big beast he dropped

the reins on to his neck and, turning to her, said: "Come, we'll get you home again."

The raw spirit sent the chilled blood racing through her veins, putting new life into her.

"Can you manage to come a step nearer?" he asked.

She hobbled forward painfully.

"Now!" he said.

Lower, lower still he stooped, his arms outstretched, and at last she felt them close around her, lifting her with that same strength of steel which she remembered on the mountain-side at Montavon. Orion stood like a statue—motionless—as if he knew and understood all about it, his head skewed round a bit as though watching under the little business which he could be satisfactorily accomplished, and bellowed gently through his very nostrils, meow-meow.

(To Be Continued.)

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm-Exterminator to give relief. Its effects are sure and lasting.

A railway season ticket, covering 175 miles of travel, was issued to a dog at Plymouth, so it could accompany his mistress, a travelling saleswoman, on her trips.

You can cook
3 vegetables
AT ONCE

in the
same
sauceman
by using

CANAPAR

Do each vegetable up in its own bag of Canapar Cookery Parchment.

There won't be any loss of flavor, and can't be, for Canapar is the best value and flavor.

Do the same with boiled or steamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No sauceman or kettle to clean up. What's more, it can be used with Canapar. Fats and juices won't burn. No more scraping or scouring of the pan afterwards.

You can use Canapar especially by simply dipping it in any sauce or gravy to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silky, strong, and doesn't spread flat. Many of the makers of the famous PARASOL Heavy Waxed Paper in the Green Box.

Special Offer

Most grocery, drug and department stores have Canapar on sale, but if you can't find it, send us a coupon direct to the makers and we'll send you a new and unique booklet entitled "Canapar", containing one hundred recipes as a bonus for your trouble.

Appleton Paper Products, Ltd.,
Hamilton, Ontario.

Please send me one full size
package of Canapar Cookery
Parchment and your 100 recipes

Chevrolet drivers soon acquire

IT'S one of the biggest thrills of modern motoring to get behind the wheel of the new Chevrolet and actually know the advantages of a 60-horsepower, six-cylinder motor, silent Syncro-Mesh shifting, free-wheeling and down-draft carburetion.

Acceleration! When the light flashes green step on the gas—then glide swiftly away ahead of the traffic! The new Chevrolet gives you matchless "pick-up"—like power that responds to every need. Keep your foot down; watch the speedometer spin up to forty—or forty-five—or more! Then slip the lever into high without even a click. That's Syncro-Mesh for you. And you can shift back to second just as easily. If you're "in" free-wheeling you needn't touch the clutch! Once you try the new Chevrolet Six, you'll never be satisfied to drive anything less!

Ack about the G.M.A.C. General Motor's own deferred payment plan. The broad inclusive General Motors Owner Service Policy assures lasting satisfaction.

Spruce Grove News

Mr Wm Sutherland arrived back from his vacation Monday evening, having spent two weeks touring the Western States.

The New Cafe building is nearing completion, and is expected to be open for business on Saturday.

Miss Marie Hartoun, of Glory Hills, has accepted a position at the Jac Brox home.

The wiring for the new business building on Railway avenue was done by a member of the staff from Stony Plain Hardware.

Messrs H and C Loeblich were called upon by Webb King to appear in the line up for the All Stars in yesterday's game.

Mrs Curris was a business visitor to Edmonton on Saturday.

The Grove's ball team did not go to Wabamun Sunday, owing to there having been a heavy rain that day at the latter place.

The following is from the columns of the Edmonton Bulletin of 20 years ago: "Mr H Christman will open a general store at Spruce Grove."

Social Evg. at the Grove.

A very enjoyable dance was given the evening of August 14th at the home of Mr and Mrs P H Goebel, by the young folks of the district.

Among those present were:

Miss Amy Schwindt
Miss Ruth Schwindt
Miss Janet Tassel
Miss Clara Goebel
Miss Frieda Goebel
Miss Marie Hartoun

Messrs Walter and Harry Brox and others.

The music was supplied by Callihoo String Band.

Funeral of Wesley Suder.

The funeral of Wesley Suder, son of Mrs Catherine Suder, who was accidentally killed in fall from a horse last week, was held Sunday afternoon from the family residence to Spruce Grove cemetery. Rev H Edwardson was in charge of the services. The funeral was largely attended.

A Good Fish Story

One of the bright young men from Spruce Grove reported that on Sunday last he saw a 148 pound flounder at Edmonton Beach. He said that was her actual weight when dressed.

Holborn Happenings.

There was a well attended meeting in Holborn hall on Monday, when the audience listened intently to instructive addresses by Donald Macleod, M.L.A., J. Russell Love, M.L.A. for Wainwright; and Geo Bevington, Winterburn. The meeting was presided over by W M Washburn, who introduced the speakers.

Mr Macleod dealt briefly with the work of the Legislature at the last session, and touched on some pertinent matters regarding the immediate problems that confront the provincial government. He also mentioned the newly formed Co-operative Commonwealth Federation and its aims for the establishment of a more equitable social and economic order.

Mr Love presented a masterly review of the financial position of the Province, bringing facts and figures to support his statements.

Mr Bevington, who spoke on monetary reform, outlined in clear and thoughtful language the history of the present monetary system, illustrating by means of charts its position in Canada today. The speaker showed how this is a debt building system and how the socialisation of finance must be the first and essential step, in order to restore the purchasing power of the masses and end the present world wide stagnation.

At the close of the meeting a lunch was served by the ladies of Holborn U.E.W.A.

The Rights of Freeman.

One of the advantages of being a free born citizen is that when you want to do anything you can go right ahead without asking anybody—except your wife, the police, your boss, your life insurance company, and your neighbors.—Edson Signal.
